Joshua Miller

Software Engineer

Houston, TX | millerjoshua737@gmail.com | (832)-244-5042 | LinkedIn | My Portfolio | GitHub

---

I am a Software Engineer with a background in the automotive and the food industry. I use a proficient and systematic approach to solve complex problems within my code. I bring my admiration for programming into every project that I tackle. My background in automotive and my experience with tricky complications enables me to approach each project with patience and logical thinking.

SKILLS

HTML / CSS / Javascript / Jquery / Node / MongoDB / React / Ruby / Ruby on Rails / SQL

PROJECTS

API-GO // Link // Source Code
- Capstone Project for General Assembly
- Package targeted to help developers kickstart a project using a third-party apis. Gives pre-written code to the user based upon the given prompts
- Technologies used: Javascript, CSS, NodeJS, Inquirer and Consola NPM Packages

The Mellow Lounge // Link // Source Code
- Music discovery app where users can search any album or song by artist and can then add the song/album to their favorites tab. Users can also post on the Feed tab
- Technologies used: React javascript framework, Sass css framework, and MongoDB, LastFm API

Bomb Squad Game // Link // Source Code
- Created a fun puzzle game based upon a game that inspired me
- Built the game using HTML, CSS, Javascript, and Jquery

RandoGroceries // Link // Source Code
- Simple groceries search app using Spoonacular third-party api. Search any grocery item to bring up related results to then add to the shopping cart if desired
- Built using React javascript framework, Sass css framework, and MongoDB

Tweeter // Link // Source Code
- Collaborative Project - Twitter clone that allows the users to tweet, like and has profile features
- Technologies used: React, CSS, and Ruby on Rails

EXPERIENCE

Software Engineer, General Assembly, Remote_____Oct 2020 - April 2021
- Worked solo and collaboratively on projects to produce full stack applications with a dynamic programming approach
- I learned technologies such as HTML, CSS, Sass, Javascript, Jquery and React for rendering frontend and Ruby, Ruby on Rails, NodeJS, Express, MongoDB, and PostgreSQL to build back-ends
- 450-hours immersive learned

Service Coordinator, Discount Tire, Humble, TX _____Jan 2020 - Present
- Inspect and service vehicles in order to provide the safest conditions to all customers
- Manage and supervise the quality and accuracy of employee's services
